The power to do it all. The
to get it right.

e precision & versatility

A professional never settles for less. The Kubota G23/G26 are nothing less than extraordinary. With a powerful Kubota diesel engine, a high-precision gear driven mower deck and the highest dump clearance in its class, the G-Series is ready for anything.

Gear Driven Twin Cut Mower Deck

Precision engineering is what makes the G-series a cut above. Instead of utilising belts, twin blades are powered in sync by a durable and precise gear drive system. This allows the path of the blades to overlap without the risk of clashing. With closer positioned blades, you get a cleaner, closer cut the first time, every time.

The gear system is fully enclosed for safe and easy handling.

High Clearance

The mower deck can be lifted up to 150 mm, giving you the freedom to move from job to job and ride over curbs.

Mowing Height Adjustment Dial

A simple twist of the dial is all that's required to adjust the mowing height to your desired cutting level. The dial allows you to make adjustments at 1/4 inch intervals for precise results.

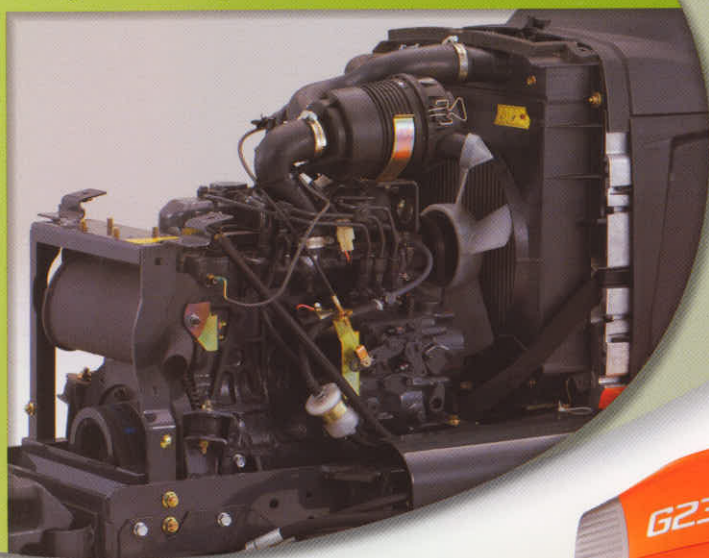

High performance mowers that

With a robust 3-cylinder diesel engine, impressive manoeuvrability and durability features to keep you rolling, you'll enjoy increased productivity. Get more out of your workday.

Powerful Engine

Powered by 23.3 HP (G23) and 25.5 HP (G26) diesel engines, these Kubota mowers have been engineered to perform faster and better. With more muscle for the job, you can even power through tall or wet grass on slopes with ease.

High Top Speed

The powerful engine and transmission of the G23 and G26 allow you to operate at a top speed of 15.5 km and 17 km respectively. As a result, travel time from job to job is reduced.

Wet PTO Clutch (G26 only)*

A durable wet-type PTO clutch allows your mower to work longer, but not harder. That's because it engages smoothly with maximum efficiency and reduced shock. This amounts to smoother operation and less maintenance.

* Belt tension clutch for G23

Minimal Turning Radius

When it comes to agility, Kubota never cuts corners. The G-series can easily get around narrow corners, make sharp turns and efficiently cut grass in the tightest areas.

Iron-cast Front Axle

We have equipped these top performers with a robust iron-cast front axle built to last. So you're free to take on heavy mowing jobs with minimal fuss on wear and tear.

Work hard, so you don't have to.

HST Pedal

When frequent changes in speed and direction are needed, HST responds with its smooth operating, single pedal control – which leaves your hands free for steering and implement control.

Big Fuel Tank Capacity

A large 20.5-litre fuel tank not only keeps you working longer between fuel stops, it also reduces the number of refuelling stops needed to complete long jobs.

Differential Lock System

Getting bogged down in mud or wet grass will no longer slow you down. Simply engage the differential lock system to achieve positive traction – and you're up and out, and back on the job.

Wet Disc Brakes

With our light-step, wet-type disc brake, you'll stop quickly and effortlessly. Plus, its durability means no drop in performance due to wear.

Built for tough tasks. Designed

Heavy-duty jobs don't have to weigh you down.

That's because we've included lots of intuitive and thoughtful features to make these Kubota mowers a real pleasure to operate.

Hydrostatic Power Steering

Hydrostatic power steering reduces operator fatigue and makes it easier to mow around trees and other obstacles.

User-friendly Control Panel

A clear and simple instrument panel, with a digital tachometer, makes it easy to read all vital functions. The light switch and hazards are also combined into one switch for easy operability.

Easy Access

Wider steps offer more foot room, making it easier to get on and off the mower.

E-mark Headlights

For your safety, the G-series is fitted with e-mark headlights that are fully compliant with ECE regulations and EC directives.

Cruise Control

For a comfortable mowing experience of large spaces, set the cruise control to maintain a constant speed without keeping your foot on the forward pedal.

for easy handling.

Large Capacity Grass Collector (detachable)

The Low Dump/High Dump models are equipped with 560 L/640 L grass collectors respectively. These generous capacities allow you to work longer without stopping to dispose of clippings. Fewer stops translate into more productive working time. Because the collector is detachable*, the mower can also be tasked with other jobs, such as towing a trailer.

* Optional dismount kit is required for High Dump model

Discharge Duct With Sensor

The G23 and G26 come equipped with an intelligent sensor at the discharge duct that beeps when the grass collector is full and ready to be emptied thus preventing clogging.

21° Angled Grass Collector

A generous 21° angled grass collector is designed to improve clearance in the rear, making it easier to mow near raised obstacles and ascend steeper inclines.

Specifications

Model		G23	G26
Engine			
Model		Kubota D902	Kubota D1005
Type		Water-cooled diesel (3 cyl.)	
Max. horsepower	HP	23.3	25.5
Total displacement	cc	898	1001
Rated speed	rpm	3200	
Fuel tank capacity	ℓ	20.5	
Transmission			
Type		Hydrostatic transmission	
Max. travel speed (Forward)	km/h	15.5	17.0
Differential lock		Standard	
Cruise control		Standard	
Speed control		F/R 1 pedal	
Tyre			
Front		16 x 7.5-8 turf	
Rear		24 x 12-12 turf	
Brake		Wet discs	
Steering			
Type		Hydrostatic power	
Uncut diameter	m	1.7	
Dimension			
Tread (F/R)	mm	900 / 840	
Wheel base	mm	1390	1460
Overall length (HD/LD w/o front weight bracket)	mm	3160 / 2980	3215 / 3035
Overall width	mm	1150	
Overall height (including G/C) (HD / LD)	mm	1600 / 1350 (steering)	
Weight (w/ mower and G/C) (HD / LD)	kg	840 / 690	890 / 735
Ground clearance (w/o mower)	mm	230	
Mower mounting			
Type		Gear drive	
PTO revolution		2600	
Clutch		Belt tension	Wet, hydraulic
Others			
Water temperature gauge		Standard	
Fuel gauge		Standard	
Hour meter / Tachometer		Standard	
Easy checker		Standard	

Mower specifications

Model		RCK48-G23	RCK54-G26
Cutting width	inch (cm)	48 (122)	54 (137)
Mower drive method		Gear drive	
Mower lifting method		Hydraulic	
Mower lifting height	mm	150	
Cutting height	inch	1.0 – 4.0	
Cutting height adjustment		Dial (1/4")	
Number of blades		2	
Blades length	mm	673	748
G/C			
Capacity (HD / LD)	ℓ	640 / 560	
Dumping height	mm	1930	
Sensor for G/C		Weight sensing	
Material of G/C bag (HD / LD)		Metal / Cloth
